Formula for calculating Dearness Allowance:

The formula for calculating Dearness Allowance would be the percentage increase of all-India Average Consumer Price Index for Industrial Workers (Base 2001=100) in preceding 12 months in question over the all-India Average Consumer Price Index for Industrial Workers (Base 2001=100) at 167 for the year July 2009 to June 2010 payable bi-annually with effect from 1st July and 1st January every year, which would be then be multiplied by the rate of neutralization and Basic Pay. Mathematically, it can be put as follows:

\[
\text{All-India Annual Average CPI} - \text{IW (Preceding 12 months in question)} \]

\[\text{Minus}\]

\[
\text{All-India Annual Average CPI} - \text{IW (July 2009 to June 2010)}
\]

\[
\text{Dearness Allowance} = \frac{\text{All-India Annual Average CPI} - \text{IW (July 2009 to June 2010)}}{\text{Rate of Neutralization (1.0) X Basic Pay}}
\]
